MATTING IS AN IMPORTANT ELEMENT IN BUSINESS WHICH IS OFTEN UNDER FOOT & OVERLOOKED.

ENTRANCE MATS offer protection for your floor surfaces and carpets. They catch dirt and moisture when it walks in the door, keeping it from going further. They also help to lift the appearance of your entryway, giving your business a professional touch.

SAFETY MATS offer a variety of features.

Anti-fatigue mats are important for workers who are on their feet all day – whether serving customers or attending machines.

Anti-slip mats help reduce the risk of falls and injuries, particular in moist or greasy areas.

We have food-grade mats, anti-static mats, and weld-safe mats, for the specialized needs of a variety of industries.

LOGO MATS go further and add your logo or message to an entrance or anti-fatigue mat. A great way to impress your customers with the prestige of your business!

We also have a number of **SPECIALTY MATS** offering benefits such as spill control, non-conductivity, anti-contamination, or glow-in-the-dark directions.

Talk to us today about your business' matting needs.
There's a solution available!
